The underPillow™ SleepSound System is a device designed to help you sleep well – it's that simple. Part pillow speaker and part sound therapy machine, you will be amazed at the clear and defined sound on this awesome system. Whether you suffer from tinnitus or just have a hard time falling asleep, our underPillow™ SleepSound System will help soothe your nerves and enable you to drift off to sleep. You can even use it to listen to music on your smartphones, iPod® MP3/CD Players, radio, or television!

#### Features:

- Ideal for tabletop or under pillow use.
- Designed for ultimate listening pleasure and sleeping comfort.
- Ultra-thin design and high fidelity speakers deliver loud, life-like stereo sound even through the densest of foam pillows.
- Built-in, pre-recorded, soothing nature sounds (a form of white noise) provide relaxation and relief.
- Connect to your own devices and listen to music, TV, audiobooks, and more. You can even upload and store up to 30 minutes of your own music!
- Listen throughout the night or use the built-in, selectable one-hour timer with auto-stop that lowers volume gradually as you fall asleep.
- AC adapter included – no worries about battery replacement.
