

Transmitter Sound Monitor

Gain an alert to a baby's cry, ringing alarm clock or other household sounds.

Portable for use in any room you wish to monitor for noise, the Medallion™ Series Sound Monitor alerts you to sounds door buzzers, oven timers or crying infants. When a sound is detected, it sends a signal to any Medallion™ Series Receiver. A delay circuit prevents activation by brief noises such as a slamming car door, and a sensitivity switch lets you adjust the sound threshold at which it activates. Readily moved from room to room, it operates on two AA batteries.

Features/Benefits

- > Signals when cries, alarms and timers are sounded
- > Works with all Medallion™ Series Receivers
- > Operates with million-code technology designed for apartments, condominiums, dormitories, hotels and public housing to ensure you never get fault alarms from neighbors using other RF-based products; also ideal for use in single-family homes
- > Features a sensitivity switch that lets you adjust the sound threshold at which it activates
- > Includes a delay circuit to prevent activation by brief noises
- > Monitors sounds in any room; fully portable
- > Operates on two (2) AA batteries (included)
- > Includes a low-battery indicator light
- > Features the Silent Call 5-Year Limited Warranty

Specifications
