

Hearing HotSpot

PORTABLE INDUCTIVE LOOP SYSTEM

[COUNTERTOP CONVENIENCE]

NEW Compact and easy to install, the Hearing HotSpot portable inductive loop system readily accommodates individuals with hearing difficulties--at a bank teller window, information desk, store counter or anywhere customers/visitors need to hear what is being said. Hearing HotSpot picks up external voices with an

integrated microphone or with an optional external microphone. The system transmits the spoken word directly and clearly to a listener's hearing aid equipped with a T-coil. The Hearing HotSpot is designed to meet ADA accessibility requirements.
